

Says

What have we heard them say?
What can we imagine them saying?

What are their wants, needs, hopes, and dreams? What other thoughts might influence their behavior?

Thinks

Problems related to irrigation infrastructure, market infrastructure add significant cost to farmer's operations.

cant cost to
"s operations.

We also feel that precision agriculture may provide a platform for industrial corporate social

responsibility(CSR)

activity.

The repeal of the farm laws in November 2021,

there were

MSP.

renewed demands

for a guaranteed

The condition of farmers is there should get fair price for their products, given affortable seeds etc,.

To get the right price for agricultural products is the main demand for farmer's movement.

Application of inputs at proper time requires timely availability of labour, water and fertilizer - all of which are becoming scarcer.

The critical issues is lack of delivery mechanisms.

INDIA'S
AGRICULTURAL
CROP
PRODUCTION
ANALYSIS (1997 - 2021)

To produce high yields, the new strains required chemical fertilizers, pesticides, and irrigation.

According to 2001 census, over 56.6 % of the main workers in India are engaged in agriculture and allied activities.

Agriculture in India depends mainly on rain for water. The monsoon rains give the right climate for many crops to grow in India. Irrigation through other water sources is used sparsely.

The emerging trends in agriculture which are very much prominent in the post-liberalisation period include the rising productivity, growing investment etc,.

Agriculture impacts
society in many ways,
including supporting
livehoods through food,
habitat, and jobs and also
provide raw materials for
food and other products;
and building strong
economies through trade.

In India, agriculture contributes about sixteen percent (16%) of total GDP and ten percent (10%) of total exports.

The share of the agriculture & allied sector in total GVA, however, improved to 20.2 % in the year 2020-21 and 18.8 % in 2021-22.

Does

What behavior have we observed? What can we imagine them doing?

What are their fears, frustrations, and anxieties? What other feelings might influence their behavior?
